TRADING RIGHTS TRANSACTIONS

ALIGO AND UNIVERSITY'S LIMITED PARTNERSHIP (ULP) REVENUES

TIME FOR GENERATING SIGNIFICANT INCOME FROM TECHNOLOGY TRANSFERS - EXAMPLE OF THE STANFORD UNIVERSITY WHICH STARTED ITS ACTIVITY 50 YEARS AGO

- Typically, 10-15 years will go by between the declaration of invention and the first significant payoff of royalties.
- The example of Stanford is powerful. Nearly 20 years were required before royalties revenues increased substantially. Stanford is now self-funded with its royalty income. In 2018-2019, Aligo achieved 16% of self-financing.
- Aligo's first projects from Valeo legacy reached the threshold of 16 years (with a volume of declaration of invention 10x less than Stanford).
